

## *A compact, adjustable powerchair*

The Blazer is compact indoor/outdoor powerchair which can be adjusted to suit the user's needs. The 60cm overall width and 100cm length makes the Blazer an ideal option in confined spaces. It is also great for outdoor use with large front castors and rear wheel suspension. There are two speed options 4mph and 6mph and large batteries can be fitted for increased range.

Adjustments include; backrest angle, seat depth, footrest position and armrest height.

### **Outdoor agility**

The Blazer is available as either a 4mph and 6mph version and can take up to 60Ah batteries for an extended range. The large 9" castors and rear wheel suspension allow the user to go outdoors with confidence.

### **Indoor performance**

The Blazer is just 60cm wide and 100cm long making it highly manoeuvrable and ideal for indoor use. The 44cm seat to floor height makes it easier to get under desks and allows for cushions.

KP-31 (standard)  
 KP-31 T(tilt-in-space)

*The compact design of Blazer provides not only a hassle free outdoor agility, but also a great indoor performance .*
